THE BOUNDARY STREET SEWER.

A Compromise Effected and the Land Con-

The jury of inquisition, empaunelled to condemn land for a public roadway through the grounds of Andrew Kramer and certain lots in Isherwood belonging to Mr. Lewis Clephano, resumed its session at the City Hall yesterday morning. Messrs, Riddle and Miller, representing the District, and Mr. L. G. Hine, the property-holders, were present, also Messrs. Clephane and Kramer. Mr. Miller said that at the session on Saturday Mr. Hine and himself had entertained different opinious as to the law governing the condemuation, and they had agreed to enter into a stipulation that the District shall be held liable for all damages growing out of the condemnation of the laud.

constructing of the sewer.

Mr. George H. Bailey was sworn in behalf of the District—He is the computing engineer for the District. He had knowledge of the for the District. He had knowledge of the line of the proposed sewer. He then took the plans and demonstrated to the jury the course the sewer would run, and what its height would be at various points; also what amount of filling would be required to bring the ground up to the proposed elevation. He stated that the greatest elevation of the sewer above the surface of the ground, through the land of Mr. Kramer, was five feet nine luches, and on the lots of Mr. Clephane about seven feet. He did not know when it was decided to open the roadway, as that was done by the Commissioners without his knowledge. He had supposed that the District owned the right of way for the sewer until informed otherwise. He had examined the sewer since it was commenced and there was no occasion to change menced and there was no occasion to change the grade. It would require a filling of five feet in depth on the top of the sawer to protect it, thereby increasing the height of the sawer above the ground that much. This closed the testimony in the case, and after arguments by Messrs. Hine and Miller the jury working and subsequently required and required and subsequently required and required and required and required and required a
